PROFESSIONAL SUMMARY

Data-driven IT professional with an MSc in Information Technology and strong experience analysing operational data, building SQL databases, developing reporting solutions and improving business processes. Skilled in SQL, Excel, Power BI, database design, REST APIs, workflow automation and data validation. Experienced supporting enterprise systems, resolving technical issues, producing management reports and developing scalable applications. Passionate about using data to improve operational performance, automate repetitive processes and support business decision-making.

PROFESSIONAL EXPERIENCE

Learning Coach – Inclusive Learning (Digital & IT)

08/2025 - Present

[Merton College, South Thames Colleges Group](#)

London, UK

- Analysed learner performance data to monitor progress and identify intervention priorities.
- Maintained accurate learner records ensuring high levels of data integrity.
- Produced performance reports for curriculum teams.
- Used Excel to monitor attendance, progress and achievement.
- Worked with multiple stakeholders to improve learner outcomes through data-informed decisions.
- Investigated discrepancies in learner information and maintained compliance with college data procedures.

Achievement:

- ✓ Improved learner monitoring through structured reporting.
- ✓ Enhanced data accuracy across multiple learner records.
- ✓ Supported evidence-based decision making using performance data.

Learning Support Practitioner (Digital & IT)

08/2023 - 07/2025

[Various Further Education Colleges](#)

London

- Supported digital systems used for learner management and reporting.
- Assisted with analysing learner data to monitor progress.
- Maintained accurate digital records across multiple departments.
- Supported users with IT-related issues and software applications.
- Worked with cross-functional teams to improve learning support processes.
- Produced reports using Excel to assist operational decision making.

Municipal IT Officer – Education Data Systems

09/2019 - 04/2023

[Ghana Education Service](#)

London

- Managed education data systems supporting more than 100 schools.
- Designed Excel reporting tools used to monitor operational performance.
- Analysed large datasets to improve planning and decision-making.
- Improved reporting accuracy by over 40%.
- Maintained high-quality data across multiple operational systems.
- Supported users with system issues and technical troubleshooting.
- Produced reports for senior management.
- Improved business processes through automation and standardisation.
- This role now sounds exactly like Operations Support.

Impact:

- ✓ Reduced reporting errors by over 40%
- ✓ Improved digital capability across multiple institutions

ICT & Mathematics Teacher

09/2013 - 09/2019

[Ghana Education Service](#)

Tano North Municipal

- Managed student performance data and reporting.
- Used Excel to analyse learner achievement and attendance.
- Produced departmental reports supporting curriculum planning.
- Supported school digital systems and IT resources.
- Maintained accurate educational records.

CORE COMPETENCIES

- SQL Development & Query Optimisation
- Power BI Dashboard Development
- Microsoft Excel (Advanced)
- Data Analysis & Business Intelligence
- KPI & Operational Reporting
- Database Design (MySQL)
- Data Validation & Data Governance
- Data Integrity Management
- Process Improvement
- Workflow Automation
- REST API Integration
- Application Support
- Stakeholder Management
- Root Cause Analysis
- Power Platform (Power Automate – Working Knowledge)
- JavaScript
- Node.js
- Express.js
- JSON
- Git & GitHub
- Microsoft 365

TECHNICAL SKILLS

Data & Reporting

- MySQL
- Power BI
- Power Query
- XLOOKUP
- KPI Reporting
- Dashboard Development

Business Intelligence

- Data Analysis
- Operational Reporting
- Business Performance Analysis
- Data Visualisation

Development

- JavaScript
- Node.js
- Express.js
- REST APIs
- JSON
- Git & GitHub

Databases

- SQL
- Database Design
- Query Optimisation
- Data Integrity
- Data Governance

Microsoft Technologies

- Microsoft Excel
- Microsoft 365
- Power Platform (Working Knowledge)
- Power Automate (Working Knowledge)

SOFTWARE DEVELOPMENT & DATA ANALYTICS PROJECTS

Founder & Lead Developer – ScoreSync (2025–Present)

Designed and developed a production sports analytics platform supporting thousands of users through data-driven decision making.
<https://getscoresync.com/>

Key Achievements:

- Designed and managed relational SQL databases.
- Built scalable backend services using Node.js and Express.js.
- Developed automated data pipelines for ingesting, validating and processing live football data.
- Created statistical reporting models and analytical dashboards.
- Implemented REST APIs supporting secure business applications.
- Developed automated workflows reducing manual processing.
- Maintained high standards of data integrity through validation routines.
- Diagnosed and resolved production issues using structured root cause analysis.
- Produced technical documentation for ongoing application development.
- Managed full deployment lifecycle using GitHub and Railway.

Technologies:

JavaScript • Node.js • Express.js • MySQL • SQL • REST APIs • Firebase Authentication • Apple Sign-In • Google Play Console • Apple App Store Connect • Git • GitHub • Railway • JSON • Claude AI

EDUCATION

MSc. Information Technology

[University of the West of Scotland](#)

Completed: May 2024

Dissertation: Machine Learning Integration in Web Development for Personalised User Experience

Relevant Areas:

- Business Intelligence
- Database Systems
- Data Analytics
- Machine Learning
- Software Engineering
- Information Systems

BSc. Administration (Marketing)

[University of Ghana, Legon](#)

Completed: April 2013

Diploma in Basic Education

[University of Cape Coast, Ghana](#)

Completed: August, 2008

KEY ACHIEVEMENTS

- Improved operational reporting accuracy by 40% through enhanced data validation.
- Managed education data systems supporting 100+ institutions.
- Designed production SQL databases supporting live analytics.
- Developed automated data processing workflows.
- Delivered reporting solutions used for operational decision making.
- Built and maintained a production software platform from concept to deployment.
- Supported multiple stakeholders through technical problem solving and data-driven insights.

PROFESSIONAL STRENGTHS

- Analytical thinking
- Problem solving
- Business process improvement
- Data governance
- Stakeholder communication
- Technical troubleshooting
- Report writing
- Attention to detail
- Continuous improvement
- Team collaboration
- Adaptability
- Customer-focused support
